Mission & Vision

Mission

To provide professional and unique solutions to Somali companies and communities with a touch of Technology.

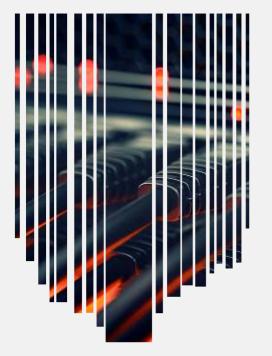

Vision

To transform the quality of living of the society by providing access to top-tier technological products and services

Our Services

VSAT

Here at Arimas Communication, we have specialized technicians trained in SCPC/ TDMA service provisions including: Ku/Ka and C-Band connectivity over dedicated and shared platforms.

LAYER2 CONNECTIVITY

In this area, Arimas presents and implements Layer 2 connectivity for local and international companies allowing them safely and securely transfer data to their intended recipients without worry of data breaches.

Our Services

WEBSITE DESIGN

There are hundreds of thousands of people browsing the internet every day and some of them are looking for your products and services. Get discovered by your clients by getting a responsive website for your business or organization. We use the latest design technology and trends to ensure your website stays modern and up to date. If you sell physical or digital products, your website will automate processes like mobile payments, invoicing etc.

CCTV INSTALLATIONS

At Arimas Communications we do back-to-back CCTV Solutions from; Sales, designs, and installations of CCTV Cameras and Surveillance Systems in Somalia.

Our diversified experience and up to date Skilled Engineers enable us to offer specialized, and unique services to meet Individuals, Corporate, industrial CCTV Installation and maintenance, and commercial markets.

Our Services

TECHNICAL SUPPORT

Our support, customer service and technical teams are always a phone call away, ready and eager to provide you with expert advice regarding your unique needs, be it; Information Technology(IT), Communication or Tailor-Made Software Solutions.

INTERNET SOLUTIONS

A well-structured wireless infrastructure efficiently tailored specifically for low downtimes and reliable speed is essential for any business. Arimas Communications wireless and network design teams will provide back-to-back Internet Solutions from consultations to installations. We do so by carefully conducting reconnaissance/ field research to identify the proper hardware, software, configurations and topology to be used in the project.

VEHICLE TRACKING SERVICES

We offer an all-in-one GPS Fleet Tracking Solution, without the costly installation charges associated with other Fleet Tracking Systems. It's a plug-and-play model with no installation hustles. Our GPS Fleet Tracking Solution has full reporting and alert functionality. It also improves the efficiency of your fleet with its maintenance feature. Our sophisticated system is able to rate drivers on a daily, weekly or monthly basis judging by how they are using your vehicles.
